CURIOUS · CREATIVE · ANALYTICAL

GULYÁS DÁVID SÁMUEL

I love creating things and solving problems, whether with numbers, a brush, code or a team of people.

I study finance and mathematics at Corvinus University of Budapest. Alongside my studies I grew Reador.art into a community of more than 600,000 followers, and I'm building ArAt, a web project that connects people with real artists. I do my best work where careful analysis meets new ideas.

600,000+ followers in the Reador.art community

01 PROJECTS

2026 · WEB · ART

ArAt

A walkable, hand-painted room on the web, behind an old Budapest door with a code keypad. Every object inside is made by a real artist, and one click takes the visitor to them. I paint the room, design the experience and build the site with coding agents.

Painting | HTML / CSS / JS | React | Firebase

2026 · GAME · WEB

Reador's Cards

A real-time card duel in the browser, played on a painted rooftop city. Two players, 23 cards and heroes drawn from code characters, and you can play the computer or a friend with a short code. I design the game and build it with coding agents.

Game design | TypeScript | Three.js | Firebase

02 EXPERIENCE

2024 — now

Reador.art · Founder

- Built an art community of 600,000+ followers
- Create content every day
- Analyse performance with my own ROI metrics
- Sell my own digital products
